

Family Perspectives on Dementia Care

If you are an adult child of a person living with dementia, you may be eligible to participate in a research study about the experiences of dementia care from the family perspective.

- The Families and Aging research program at Canadian Mennonite University is looking for volunteers to participate in conversational interviews about their experiences.
- As a participant, you would be asked to describe your experience of dementia care from your point of view in an interview.
- The interview can take place in person or online and would take approximately 60 minutes.
- In appreciation of your time, you would receive a \$25 gift card for a local coffee shop or grocery store.

This study has been approved by the CMU Research Ethics Board.
